

# FSInf-COVID rules (2021-06-02)

- Adhere to current governmental regulations
- **If you feel sick (COVID or not) STAY THE FUCK HOME!**
- **Have your “3G”-proof with you (tested or vaccinated or recovered)**
- Keep distance – at least 4-5 Laptops (2m)
- Use FFP2-Masks when standing/walking
- Wash your hands regularly
- Disinfect and clean up your place on arrival and departure
- **Keep windows open at all times** – but run Linux :)
- Stick to the diagonal seating/marked places. Doing group a assignment is no valid reason to huddle together.

**/cpl --yes**

## Corona Presence Logging

**TU Wien requires us to perform mandatory Contact-Tracing since 7.7.2020.  
We do this online via Mattermost.**

The mattermost command **/cpl** is our approach to Corona-related presence logging at FSInf. Use **/cpl --yes** in any Mattermost channel to get your presence at FSInf logged for that day. **This is also a mandatory requirement by TU Wien.**

In our opinion this is the most privacy-preserving way to do this. Your Mattermost userid & timestamp will be stored for about a month. This information will only be used to notify potentially exposed people when necessary.
